

Name: _____

Show what you know

Can you...

- describe the main stages in the lifecycle of a plant?
- name some parts of a plant and explain how they are important in the reproduction process?
- describe the role of pollinators in the lifecycle of plants?
- explain how living things, including plants and animals, depend on each other to survive?
- communicate my ideas about lifecycles using diagrams and scientific vocabulary?

Your task is to create a simple presentation to showcase your understanding about how plants reproduce through pollination and seeds.

First, create a storyboard to plan your presentation, then choose how you will present your understanding.

I can...	
describe the main stages in the lifecycle of a plant, including pollination	<ul style="list-style-type: none"> ○ I drew a simple picture or named the main stages of the lifecycle of a plant ○ I sequenced the stages correctly ○ I described how pollination works ○ I gave detailed descriptions of the life stages of a plant and the pollination process
name some parts of a plant and explain how they are important in the reproduction process	<ul style="list-style-type: none"> ○ I labelled some parts of the flower, including some male parts and some female parts ○ I explained the role of the parts of the flower in pollinating flowers
describe the role of pollinators in the lifecycle of plants	<ul style="list-style-type: none"> ○ I described how a pollinator helps flowers to reproduce
explain how living things, including plants and animals, depend on each other to survive	<ul style="list-style-type: none"> ○ I can describe reasons why plants need animals to survive ○ I can describe reasons why animals need plants to survive
communicate my ideas about lifecycles using diagrams and scientific vocabulary	<ul style="list-style-type: none"> ○ I can organise my ideas clearly using diagrams and images ○ I can explain my ideas using scientific words
